Stand Out with Anthropic Certification

All Athaca career paths include company-paid Claude certification training and examination, helping you develop practical AI expertise, earn a recognized professional credential, and strengthen your resume and future career opportunities.

Who We Are

Athaca is a U.S.-based AI and technology company expanding into Europe through Athaca Poland. We build and deploy innovative AI solutions that address real-world challenges in life sciences and beyond.

What We Are Looking For

Curiosity and strong technical fundamentals matter most. We welcome candidates from Computer Science, AI, Data Science, Software Engineering, and related fields with programming proficiency, an interest in AI/ML, strong problem-solving abilities, a willingness to learn, and strong communication and collaboration skills.
